MASTER SYLLABUS

COURSE NO., HOURS, AND TITLE:

RAD 595, 6, Graduate Internship

COURSE DESCRIPTION:

This course is designed to give real-world experience to future radiologic technology educators or managers by exposing the student to common issues which may arise in their area of specialization including: classroom management, instructional skills, instructional assessment, lesson planning and development, direct teaching experience, human resource management, budgeting, medical legal issues in radiology, ethics and law. One credit hour equals 40 contact hours. Special approval: Consent of Program Director and will be subject to the feasibility of meeting state licensure requirements.

PREREQUISITE TO: N/A

COURSE OBJECTIVES

The primary objective of RAD 595 is to allow the student the opportunity to apply the theories of either education or management that have been learned throughout their didactic coursework. This is accomplished through an applied internship in either education or management, depending upon the students chosen area of specialization. Therefore, the internship should at a minimum:

1. contribute to your professional goals
2. give experience and expertise not available in the classroom
3. contribute a service to the participating instructor
4. increase your understanding of Radiologic Science Education or Management
5. provide active participation in the educational or managerial setting
6. enhance the reputation of the University, College, Department, Program and the Student, along with contributing to the enhancement of professionalization of the field of Radiology

TOPICAL OUTLINE:

Topics

I. Specific goals, topics and objectives will be determined by the student and approved by both the faculty advisor and the internship preceptor.

II. Real-world Problem Solving and Experience 100%.
