

Congratulations on your acceptance into the Masters of Healthcare Informatics program at SIUC – home of the Salukis! We look forward to taking this journey with you toward a graduate degree in Healthcare Informatics.

Please take a minute to complete a short new student survey online at <https://www.surveymonkey.com/r/Grad-student>

It is our intention to meet every need of our graduate students, many who are already working professionals in healthcare. Our 100% online courses can be completed as your schedule allows. One course (MHI 585) will be held synchronously through live video conferencing. Mapping your course sequence to completion from the start is highly recommended to meet your graduation goals. Please see suggested course sequence.

To register for classes, visit Salukinet at <http://salukinet.siu.edu/>. Enclosed are the following resources to help get started:

- Example Course Sequence
- List of Course Curriculum
- Self-Registration Instructions

Interested in earning the MHI and MHA degree?

If you are interested in a Masters of Health Administration (MHA) in addition to your MHI degree, you should apply to the MHA program during the last semester of your MHI program. The benefit of earning both degrees is that the second degree only requires an additional 21 credit hours of MHA coursework.

On behalf of the College of Applied Sciences and Arts, and the School of Allied Health, welcome to our program. We wish for your experience to be memorable and rewarding, positioning you for a leadership position in the dynamic field of healthcare.

Sincerely,

School of Allied Health
